Hobbies

Objective

- Short-term: Learning more knowledge and programming languages. I'm willing to learn new knowledge, and because I am a fast learner and can adapt to new situations so I don't mind if being handed over a hard and pressured job.
- Long-term: Become a Software Engineer, Project Manager

Education

DUY TAN UNIVERSITY   *2018- Present*

Major: Software Engineer

GPA: 3.10/4

Experience

DataHouse Asia Company   *Feb 2022- May 2022*

Full-Stack Developer

Full-Stack Developer
Lumisight M&O Company Project
- M&O has a list of projects. Every Lumisight project of the company after UAT and on production will move to Lumisight M&O Project to manage and maintain. That means if the customers have any changes request for any project in M&O and we just handle that.
- Because of the confidentiality, I cannot share more information about the project of the previous company

Back-End Developer
BPP-MS Company Project (Business & Personal Property Management Solution)
- Now the assets are divided into real estate, and movables, but this application just managing about the moveable property, example: If any people have a plane or car, that can be managed by a government agency, and they need to pay an annual tax payment and the process of managing is process electronics, move all through internet and not need to deal, handle through paper
- Because of the confidentiality, I cannot share more information about the project of the previous company
